- Supplementary valuations
- Objection case management
- Customisable lookups & modelling
- Bing maps overlays
- Upload attachments to property

ADAERO by Advance Computing is the emerging force in Municipal Property Valuation software with a dynamic new platform with in field and back office efficiencies.

Developed in conjunction with valuation professionals, Adaero combines mobile capability, online & offline content & powerful Business Intelligence modelling & reporting, meaning you can satisfy your clients requirements anywhere in the country, anytime.

Data on your terms: On premise or securely cloud hosted, retain control and access to your data.

Extensive Reporting: Valuation Best Practice compliant Stage 1-5 reporting, General Valuation reports.

Powerful searching: Filter properties from any field using in field or full text searching.

Offline capability: The reality is field inspections are sometimes completed outside of mobile coverage. Take the full functionality of Adaero on the road.

Property at your fingertips: View, change and calculate valuations in one screen or edit multiple properties and values at once.

Flexible modelling: Use a range of valuation methods and calculations.

With full statistical analysis, Valuation Best Practice & Data Responsibility compliance Adaero offers the next level in flexibility and customisation to suit your needs, without the need for Add-Ons or plugins.

The 'PowerGrid' view allows the filtering and update of mass data, saving hours of data entry and validation, combined with MS Excel integration to meet customised internal reporting.

Automated production of Stage 'Reports of General Valuations' eases the task of data analysis and commentary. Adaero allows your focus to remain on revenue generating activities, while ensuring auditability & compliance obligations are maintained by the software.

Backed by Advance Computing, Adaero offers unparalleled flexibility and integration giving you peace of mind your investment is secure and forward compatible with government or legislative requirements.
